## Why Choose Blinds & Beyond Curtains

Custom curtains come in various styles, like those that block out light or soft, sheer ones. These curtains play a big role in how a room looks and offer many useful advantages. They let you have full control over the environment in your home. The way these curtains look and how well they work make them a smart choice. They can also increase the value of your home.

At Blinds & Beyond, we proudly make our curtains in Australia, and this comes with several important advantages. When you choose our curtains, you can expect higher quality, more options, and better service. Since we manufacture our curtains ourselves, we can offer you competitive prices with no hidden costs. This means you get more value for your money.

### OUR CURTAINS PROVIDE:

- Complete control over the amount of light entering your space.
- Ensured privacy.
- Great insulation for temperature and noise.
- They can enhance the value of your home.
- Protect your furniture, decor, and flooring from UV damage.
- These curtains are made specifically for the Australian market.
- They can be custom-made to fit any window size or shape.
- Each curtain is 100% custom-designed and manufactured.
- We maintain consistent quality through rigorous quality control testing.
- Our curtains are made to withstand Australia's harsh climate with top-quality fabrics and components.
- You can have peace of mind with our child and pet-safe controls.
- They operate smoothly, quietly, and are easy to use.
- You have the flexibility to choose the style, fabric, transparency, color, finish, control type, and accessories from the widest range available in Australia.

## Step **1** SELECT TYPE

### SHEER CURTAINS

- DESIGNED AND MADE IN AUSTRALIA.
- OFFER HIGH-QUALITY, AFFORDABLE DESIGNER FABRICS.
- CUSTOM-MADE FOR ANY WINDOW.
- GO THROUGH STRICT QUALITY CONTROL AND TESTING.

# Step 3 SELECT TYPE

Selecting the heading style for your curtains is a crucial decision that determines the right curtain for you. Each heading style offers a unique appearance and varying levels of fabric fullness.

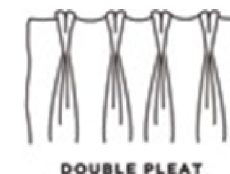

## WAVE FOLD

Known as 'S' fold, creates elegant waves, elongates walls, modern style.

## DOUBLE CURTAINS

Modified Pinch Pleat, pairs of pinches, neat look for large windows.

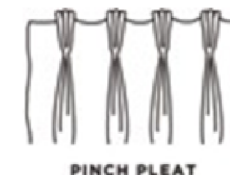

## EYELET CURTAINS

Metal rings and decorator rod for a relaxed look, minimal stack-back. Suitable for both blackout and sheer curtains.

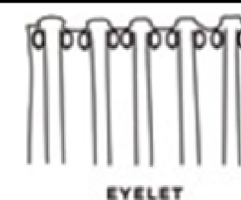

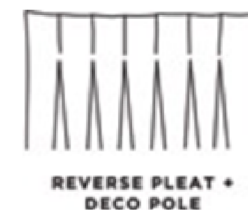

## PINCH PLEAT

Classic, pinched style, perfect for traditional spaces, achieves beautiful fullness.

## REVERSE PLEAT

This style offers a tailored look, hangs below a decorator rod, and has a larger stack-back. Suitable for blackout curtains.

# BANDING + TRIMS

Elevate your curtains with a decorative touch or a vibrant splash of color—our design team can incorporate banding or trims along the top, bottom, or sides. Choose a complementary fabric for a subtle and harmonious finish, or opt for a contrast fabric to make a bold statement. Additionally, the combination of sheer and heavier weight fabrics offers a beautiful way to introduce texture and enhance visual appeal.

If you have a room with soaring ceilings, banding is an ideal solution. By adding another fabric to the top or bottom of the curtain, you can attain the desired length without introducing additional seams. Moreover, banding across the top of a sheer curtain in a heavier fabric serves as a clever way to conceal a wall or the top of a blind that might be situated behind it.

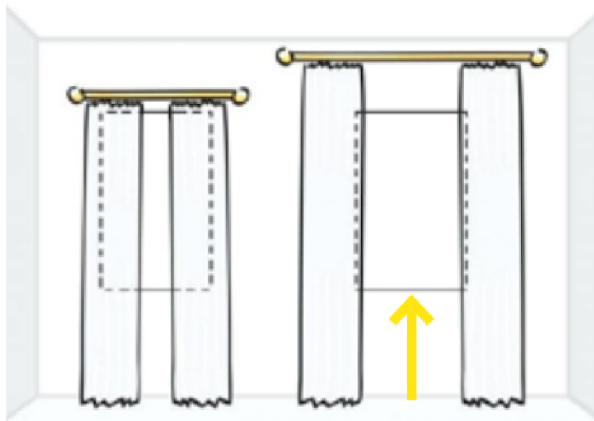

## Step 4 SELECT TYPE

### Width

Choose wall-to-wall width if wall space is available. This minimizes the "stack back" and maximizes views and natural light.

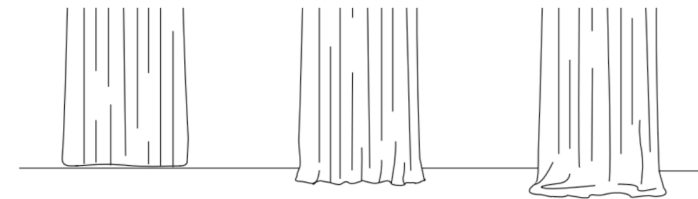

### Height

Installation options: ceiling fit or wall fit. Opt for ceiling to floor if wall space allows; it enhances the room's height, light blockage, and insulation.

### Length

The curtain length is your choice. Custom-made curtains can vary, but we recommend going past the window sill to the floor for light control, privacy, and insulation, except when installing above a breakfast nook or bench seat.

### Stacking

Our curtains offer flexible options: center opening, one-way opening (left or right stack), or free-floating. Choose what suits each window's practicality and function best.
